F.O. BENDING LOSS APPARATUS MODEL FO-BLA

FO-BLA Model is a JAIN LASERTECH make F.O. Bending Loss Apparatus that is available as part of a set of extra accessories that can be used with our standard Diode Laser Characterization Kit.

This set of accessory is useful in studying and to find the transmission loss caused in optical fibers when they are bent at corners of different circles in fields while being laid for local area network.

The apparatus has a smaller circle of 35 mm dia. and increases in steps of 10mm diameter giving largest circle of 65 mm dia.

A 5 meter length of thin optical fiber is provided with ends fixed to fiber holders suitably.

This product is suited ideally for any educational and research laser / fiber-optics / physics laboratory.
